**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US05/05726

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ in written format

☐ in computer readable form

c. time of filing/furnishing

☐ contained in international application as filed.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US05/05726

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-29</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-29</u>	NO
Industrial applicability (IA)	Claims <u>1-29</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-29 lack novelty under PCT Article 33(2) as being anticipated by Abad (USPN 5,538,740). The reference discloses a therapeutic and cosmetic topical formulation for the treatment of skin and a method of using said composition. The composition is a cream comprising a carrier that is applied to the skin in order to remove photo-aging damage (col. 3, lin. 32-col. 5, lin. 25). The carries include polyethylene glycol and the composition delivers arginine a nitric oxide donor to the skin (example III). The composition includes vitamins A and D as well as mineral oils as well as sodium chloride (col. 7, lin. 1-25). The cream is an anti-wrinkle cream that lifts and firms the skin it is applied to (examples. These disclosures teach the novelty of the instant claims and render them anticipated.

Claims 1-29 lack an inventive step under PCT Article 33(3) as being obvious over the disclosures of Abad (USPN 5,538,740). As discussed above Abad discloses a method of treating skin that teaches the novelty of the claimed inventions. It is the position of the Examiner that these teachings also disclose the inventive step of the instant claims, since they embody each and every step of the instant claims. It would not be inventive to arrive at the presently claims since they have been taught by the prior art.

Claims 1-29 meet the criteria set out in PCT Article 33(4), and thus possess an industrial applicability because the subject matter claimed can be made or used in industry.
